

Open-source data science in a disrupted world

Uli Muellner

A time of changes

- Lots of volatility and economic uncertainty
- Community is important – let's continue to innovate together!
- Posit driving open-source data science
- We'll dig deeper into some of the advances today!

The next-gen IDE is here!

- + Multi-language
- + Lots of extensions!
- + AI enabled
- + OS Desktop version / Posit Workbench

What happens to Shinyapps.io?

The screenshot shows the Shinyapps.io dashboard for application 91519 - FIRSTAPP. The interface includes a sidebar with navigation options like Dashboard, Applications, Running, Sleeping, Archived, and Account. The main content area has tabs for Overview, Metrics, URLs, Settings, Users, Logs, Restart, Archive, and Delete. The Overview section displays application details: Id: 91519, Name: firstapp, URL: https://tareef.shinyapps.io/firstapp/, Status: Sleeping, Size: large, Deployed: Mar 31, 2016, Updated: Mar 31, 2016, Created: Mar 31, 2016, and a Download button. The INSTANCES section shows Id: 400007. The APPLICATION USAGE section features a line graph showing usage over time from Mar 25 to Mar 31, with a total of 0.30 hours.

The screenshot shows the Posit Connect Cloud landing page. The header includes the Posit Connect Cloud logo, navigation links for 'Why Connect Cloud?' and 'Plans', and 'Log In' and 'Sign Up' buttons. The main content area features the headline 'Quickly publish and share your work' and the sub-headline 'A cloud environment to easily showcase your Python and R content.' Below this is a 'Sign up for free' button. The bottom section displays logos for various data science tools: quarto, Shiny, rmarkdown, Streamlit, jupyter, Dash by plotly, and bokeh.

- + Posit Connect
- + Epi managed hosting

Posit AI
is here!

ASSISTANT + NEXT EDIT SUGGESTIONS

“Think first. Code second.”

- + Specifically build for data analysis
- + Access to live R session
- + Zero Data Retention with Anthropic
- + Available in RStudio and Positron Desktop
- + Free demo available!

The future is exciting

- “Polyglot” approach – expanding toolset
- AI tools are advancing and so is our understanding of use cases
- Open-source is driven by collaboration

I hope you all have a great day!
